

Tube Tread

1.2mtr x 2mtr Roll

Tube Tread's elevated 'joined tube' design provides comfort and noise reduction and allows water and liquids to drain away.
Its comfortable tubular design is mildew resistant, making it a great choice for wet areas.

The hollow tubes provide a 'cushioned' effect, reducing user fatigue when standing. Tube Tread mats provide insulation against wet or damp surfaces as well as cold & noise insulation. A quick damp cloth wipe down or hosing is usually all that is required.
